Working together for a hunger-free Iowa

For more than 42 years, Food Bank of Iowa has provided food for Iowa children, families and seniors to lead full and active lives, strengthening the communities where they live. Much has changed since 1982. Food Bank of Iowa serves more people through our 700 partners in 55 counties — providing 300 times more food today than we did in 1982. But much has stayed the same. Food insecurity is pervasive. And Food Bank of Iowa remains focused on our mission to alleviate hunger in our state.

Food Bank of Iowa and Nationwide are honored to host the annual CHOPPED — HOT DISH EDITION casserole competition at the Iowa State Fair. This is the latest edition of our cookbook, which shares winning recipes as well as basic cooking instructions for common dietary staples such as rice and beans. We've also included some helpful food preservation methods and safety guidelines.

Please share this cookbook with your friends and family and visit foodbankiowa.org to learn how you can volunteer, donate and advocate for our neighbors facing food insecurity.

The only way we can solve hunger is by working together.

1 tablespoon onion powder
4 cups shredded sharp cheddar cheese
2 cups of corn

3 tablespoons butter
¾ cup bread crumbs
½ cup crushed French fried onions
¼ cup crumbled bacon
1 teaspoon paprika

Top with the rest of the ketchup and barbecue sauce mixture. Place the dish in the oven and bake the meatloaf for 30 minutes.

Step 2

While the meatloaf is in the oven, cook the macaroni noodles according to package directions; drain. Combine the milk, soup and seasonings in a large mixing bowl. 1 packet fajita seasoning mix
4 cloves garlic, crushed; or 2 tablespoons
minced garlic
2 tablespoons olive oil
1 (8-ounce) package frozen pepper and

Stir to combine and bring to a boil; then cover, reduce heat to medium-low, and cook for 15 minutes until pasta is tender and liquid is mostly absorbed. Add the chicken and veggies back into the skillet and stir to combine until heated through, about 2 minutes.

DRIED BEANS (OVERNIGHT STOVETOP)

INGREDIENTS

Beans
Water
Salt/Pepper
Seasonings
Aromatics
- Onion
- Garlic cloves
- Herbs

DESCRIPTION

Cooking dried beans might require a bit more effort than heating up a can, but it is 100% worth the effort.

Boiling the beans with flavorings will give them a boost. Use in any recipe that calls for beans like tacos or burritos, casseroles or just eat them as a side on their own — mashed or whole!

1 pound dried beans = about 6 cups of cooked beans

DIRECTIONS

The day before you plan to cook your beans, rinse them and check for stones and debris. Place them in a very large bowl or pot and add enough water to cover by at least 4 inches. The beans will absorb the water so make sure to add enough. Cover and let sit for at least 6 hours but preferably overnight. If you forget or can't soak overnight, check out the Quick-Soak Method (next page).

Drain beans from their soaking liquid and give them a quick rinse. Add them to a large pot and cover with another 4 inches of fresh water. The beans will absorb even more liquid this time so be sure to add enough. With your water, add any aromatics that you like (a halved and peeled onion, garlic cloves, fresh herbs and 2 dried bay leaves). This adds a lot of flavor to your beans. Don't add salt at this stage! Salt tends to break down the skins and can turn your beans mushy.

Bring beans and water to a boil, then reduce heat and simmer, covered, for about an hour. Give an occasional stir and start checking them at around 45 minutes by tasting — keep cooking until they are completely tender. Add more water if necessary while cooking so that they stay completely covered.

When your beans are tender, remove the aromatics and drain. Now you can season with salt, pepper, and any other seasonings you prefer. They are ready to use in a recipe or eat!

DESCRIPTION

Cooking dried beans might require a bit more effort than heating up a can, but it is 100% worth the effort.

Boiling the beans with flavorings will give them a boost. Use in any recipe that calls for beans like tacos or burritos, casseroles or just eat them as a side on their own—mashed or whole!

1 pound dried beans = about 6 cups of cooked beans

DIRECTIONS

Rinse the beans and check for stones and debris. Transfer to a large pot and cover with 2 inches of water. Bring to a rolling boil and cook for 1 minute. Remove pan from heat, cover, and let beans soak for 1 hour.

Drain beans and return to pot. Cover with 4 inches of fresh water and add a halved onion, garlic, and bay leaves. Bring to a boil and cook for 10 minutes, then reduce heat to low. Cover the beans and lightly simmer until tender, 1-2 hours depending on the size and age of the beans. Stir occasionally and add more water if necessary.

When beans are tender, remove aromatics and then season to taste with salt and pepper.

COOKING INSTRUCTIONS

DRIED BEANS (MICROWAVE)

INGREDIENTS

Beans
Water
Salt/Pepper
Seasonings
Butter (optional)
Oil (optional)

DIRECTIONS

The day before, rinse beans and then soak overnight in 1 quart cold water. Do not drain.

Combine beans, soaking water and drippings in 4-5 quart casserole. Cover with tight-fitting lid and microwave on HIGH 7-10 minutes until boiling.

Stir, cover and microwave on MEDIUM 35-50 minutes, stirring gently every 15 minutes until beans are tender.

Drain beans. Season beans to taste. Enjoy!

MICROWAVE COOKING TIPS

To avoid boil over, always use a casserole at least twice the volume of the ingredients put into it. Add a tablespoon of meat drippings, margarine, butter or oil, to keep beans from bubbling over.

Always cover beans with a tight lid to keep them from cooking dry— not plastic food wrap, which will split during long cooking.

Never salt beans until after they're cooked; it can toughen them.

Never try to hurry the beans along! By keeping the power on HIGH (100%) the entire time, you'll merely toughen and dry them. Once the bean liquid has come to a boil, reduce the power to MEDIUM (50%) for the duration of cooking so the beans will absorb the liquid slowly and soften.

Make sure the beans are tender before you take them from the microwave. Although they will continue to absorb liquid as they stand, they won't become any more tender. If beans are not tender at the end of the recommended cooking time, continue to microwave in 5-minute increments, stirring after each.

COOKING INSTRUCTIONS

EGGS

SOFT-COOKED AND HARD-COOKED EGGS

Place eggs in saucepan. Add enough cold water to come at least 1 inch above eggs. Bring to rapid boil. Remove from heat and cover pan. Let stand 2-4 minutes for soft-cooked eggs or 15-20 minutes for hard-cooked eggs. Immediately run cold water over eggs to prevent further cooking.

For soft-cooked eggs, cut eggs in half and scoop egg from shell.

For hard-cooked eggs, remove shell by cracking or rolling it between your palms. Rinse peeled eggs with water to ensure all pieces of shell are removed.

POACHED EGGS

In pan or skillet, heat 1 ½ - 2 inches of water to boil; reduce to simmer. Break egg into small cup or saucer. Slip egg into water, holding cup or saucer close to surface. Cook 3-5 minutes depending on desired doneness. Lift egg from water with slotted spoon or spatula.

SCRAMBLED EGGS

Yield: 2 servings

Total cook time: 10 minutes

Ingredients:

4 eggs, beaten

¼ cup milk

½ teaspoon salt

Pepper, to taste

1 tablespoon vegetable oil

Combine eggs with milk and seasoning. Add oil to pan and heat until sizzling. Pour in egg mixture. Cook and stir over medium heat until eggs are well-cooked and firm, about 3-5 minutes.

MEAT

ROAST TURKEY

Preheat oven to 325° F. Place turkey breast side up in shallow roasting pan. Brush with margarine and bake uncovered. Follow timetable below for cook times.

Weight of Turkey

8-12 pounds	3 ½ - 4 ½ hours
12-16 pounds	4 ½ - 5 ½ hours
16-20 pounds	5 ½ - 6 ½ hours

Use a meat thermometer if possible. It will read 165° F if done. You can also test doneness by moving the drumstick up and down. The joint should move freely when the turkey is fully cooked. Remove from oven and let stand 20 minutes before carving.

ROAST BEEF

STOVETOP

In a small saucepan, bring water (or milk) and salt to a boil.

Stir in oats and cook about 5 minutes over medium heat, stirring occasionally.

COOKING INSTRUCTIONS

POTATOES

BAKED POTATOES — WHITE AND SWEET

Plan on 1 medium potato per person. Wash potatoes. Pierce white potatoes with fork before baking.

Cook at 325°-375° F for 1 hour or at 400°-450° F for 30-40 minutes.

When potatoes are done, cut a slit in top of each potato.

MASHED POTATOES

Yield: 2 servings

Total cook time: 30 minutes

Ingredients:

2 medium potatoes, peeled and sliced

¼ teaspoon salt

1 tablespoon margarine

2 tablespoons milk

Simmer potatoes in small amount of water, covered in pan for about 20 minutes.

Drain potatoes. Add salt and margarine; beat well. Gradually add milk, beating until light and fluffy.

COOKING INSTRUCTIONS

RICE (Long grain white rice)

INGREDIENTS

2 cups long grain white rice
Pinch of salt
3½ cups low-sodium chicken stock or water

DIRECTIONS

Place rice and cooking liquid in a large microwave-safe bowl. Rice doubles in size during cooking so choose a container large enough to accommodate final product.

Microwave uncovered on HIGH setting (100%) for 10 minutes. Then microwave uncovered on medium low setting for 15 minutes. Do not stir rice at any time during cooking. Remove from microwave. Cover and let rest for 5 minutes. Remove cover and if any liquid remains, pour it out.

Season with salt and fluff with a fork before serving.

STOVETOP

Place your rice in a fine mesh strainer and rinse under cold water until the water runs clear—about 20 seconds.

For most types of rice, you'll always use a ratio of 1 cup rice to 2 cups water. Feel free to swap the water with low-sodium chicken or vegetable broth for more flavor. Bring the cooking liquid to a boil and stir in rice and a pinch of salt.

After adding the rice, the temperature of your water will drop significantly and it will stop boiling. Let it come back to a gentle simmer. Cover the saucepan and reduce heat to low.

Taste it—let the rice be your indicator for doneness, not the water. If rice is chewy, or hard in the center, cook it a little longer. You don't want the rice grains to be mushy, either. If there's a little water left over, it's totally fine! Just tilt the saucepan slightly to drain it out.

Turn off the heat, replace the lid and let it rest for 5 minutes in the steamy saucepan. Use a fork and fluff the rice. It's now ready to serve!

COOKING INSTRUCTIONS

FOOD PRESERVATION GUIDE

HOW TO FREEZE VEGETABLES

Vegetables that hold up well to cooking (peas, green beans, broccoli, carrots) generally freeze well. Store in freezer for up to 18 months.

First, thoroughly clean your vegetables by rinsing in cold water.

Next, blanch (parboil) vegetables briefly in boiling water for 2-5 minutes until they are just barely tender. Test for doneness. Remove vegetables from boiling water and quickly submerge them in ice water for the same length of time or until completely cooled. Drain thoroughly.

Pack vegetables in a plastic freezer bag or freezer container. Force as much air out as possible. Date your packages and store in the freezer for later use.

HOW TO FREEZE CORN (OFF THE COB)

Remove husks and silk from corn and rinse thoroughly in cold water.

Place corn, a few cobs at a time, in a large pot of boiling water for 4 minutes.

Remove corn from boiling water and cool in ice water for 4 minutes.

Remove corn from ice water and cut kernels from the cob.

Pack corn in plastic freezer bags or containers. Force as much air out as possible. Date your packages and store in the freezer. For best quality, eat within 8-12 months of freezing.

HOW TO FREEZE BERRIES

Rinse (don't soak) berries thoroughly in cold water. (For strawberries, cut off and discard stems and slice the berries if desired.)

Arrange berries in a single layer on a baking sheet and place in the freezer for 2 hours, or until completely frozen.

Once frozen, transfer berries to a plastic freezer bag or freezer container. Force as much air out as possible. Date and store in the freezer for up to one year, although color and flavor may begin to fade after six months.

FOOD PRESERVATION GUIDE

HOW TO FREEZE STRAWBERRIES (DRY SUGAR METHOD)

Rinse strawberries in a colander, discarding any unripe or bruised berries. Drain well and let rest a few minutes to dry.

Cut off and discard berry stems. Slice or cut strawberries into halves or quarters. Transfer into a large bowl.

Sprinkle $\frac{1}{2}$ cup of sugar per quart of strawberries into the bowl. Gently stir strawberries to coat and dissolve sugar.

Immediately transfer sugar-coated strawberries into plastic freezer bags or other airtight containers. Label and date contents and store in freezer for up to one year.

HOW TO FREEZE TOMATOES

Wash tomatoes. Remove stems. Using a paring knife, cut an "X" in the bottom of each tomato.

Bring a large pot of water to a boil. Blanch a few tomatoes at a time in the boiling water, just long enough until the skin starts to curl up where you scored it (about 30-90 seconds depending on the size of the tomato).

Remove tomatoes from boiling water with a slotted spoon and dip them in ice water. Then place them in a colander placed over a bowl to catch any excess liquid.

When the tomatoes are cool enough to handle, core the tomatoes and remove the skin. The skin should slide off easily.

Tightly pack the tomatoes (whole, halved or quartered) into freezer bags or airtight containers. Force as much air out as possible. Label and date contents and store in freezer for up to one year.

FOOD PRESERVATION GUIDE

HOW TO FREEZE PEACHES

Start with ripe peaches.

Using a paring knife, cut an “X” in the bottom of each peach, taking care not to cut deeply into the flesh.

Place each peach in a pot of boiling water for 15 seconds.

Remove from boiling water with a slotted spoon and place directly into ice water to stop the cooking process.

Once cool, use a paring knife to catch the skin at the base of the “X” and peel toward the stem. The skin should come off easily.

Once peeled, cut the peach in half, starting along the crease of the peach and running your knife all the way around. Twist the two halves to release one from the pit. Use the tip of a knife or fork to release the pit from the remaining side.

Slice each peach half into 4-8 wedges and place in a bowl. Toss the juice of one lemon and $\frac{1}{2}$ teaspoon of sugar with every 8-10 peaches. The lemon juice will help prevent browning, and the sugar will release juice from the peaches, helping prevent air pockets when freezing. (You may also use a product such as Ball Fruit-Fresh Produce Protector instead of lemon juice, if desired.)

After tossing with lemon juice and sugar, place in a gallon-sized zipper freezer bag. Force as much air out as possible. Label and date contents and store in freezer for up to 12 months, although flavor may fade after six months. Storing bags flat will take up less freezer space.

OTHER FOOD PRESERVATION METHODS

Drying can be used to preserve herbs, fruits, vegetables and meats.

Canning can be used to preserve fruits, vegetables and meats. Proper equipment (glass jars, canning lids and rings, etc.) and boiling water are needed.

Pickling/fermenting can be used to preserve your produce. Salt, vinegar, glass jars and boiling water are needed.

FOOD SAFETY GUIDE

CLEAN: WASH YOUR HANDS AND SURFACES OFTEN

Germs that cause food poisoning can survive in many places and spread around your kitchen.

Wash hands for 20 seconds with soap and water before, during and after preparing food and before eating.

Wash your utensils, cutting boards and countertops with hot, soapy water.

Rinse fresh fruits and vegetables under running water.

SEPARATE MEATS FROM VEGETABLES DON'T CROSS CONTAMINATE

Raw meat, poultry, seafood and eggs can spread germs to ready-to-eat foods—unless you keep them separate.

Use separate cutting boards and plates for raw meat, poultry and seafood.

When grocery shopping, keep raw meat, poultry, seafood and their juices away from other foods.

Keep raw meat, poultry, seafood and eggs separate from all other foods in the fridge.

CHILL: REFRIGERATE PROMPTLY

Bacteria can multiply rapidly if food is left at room temperature or in the “Danger Zone” between 40° F and 140° F. Never leave perishable food out for more than 2 hours (or 1 hour if it’s hotter than 90° F outside).

Keep your refrigerator at 40° F or below and know when to throw food out.

Thaw frozen food safely in the refrigerator, in cold water, or in the microwave. Never thaw foods on the counter, because bacteria multiply quickly in the parts of the food that reach room temperature.

FOOD SAFETY GUIDE

COOK TO THE RIGHT TEMPERATURE

Food is safely cooked when the internal temperature gets high enough to kill germs that can make you sick. The only way to tell if food is safely cooked is to use a food thermometer. You can't tell if food is safely cooked by checking its color and texture.

Use a food thermometer to ensure foods are cooked to a safe internal temperature. Check this chart for a detailed list of foods and temperatures.

FOOD	TYPE	INTERNAL TEMPERATURE (°F)
Ground meat and meat mixtures	Beef, pork, veal, lamb	160°
	Turkey, chicken	165°
Fresh beef, veal, lamb	Steaks, roasts, chops Rest time: 3 minutes	145°
Poultry	All poultry (breasts, whole bird, legs, thighs, wings, ground poultry, giblets and stuffing)	165°
Pork and ham	Fresh pork, including fresh ham Rest time: 3 minutes	145°
	Precooked ham (to reheat)	165° Note: Reheat cooked hams packaged in USDA-inspected plants to 140°F
Eggs and egg dishes	Eggs	Cook until yolk and white are firm
	Egg dishes (such as frittata, quiche)	160°
Leftovers and casseroles	Leftovers and casseroles	165°
Seafood	Fish with fins	145° or cook until flesh is opaque and separates easily with a fork
	Shrimp, lobster, crab and scallops	Cook until flesh is pearly or white, and opaque
